3M™ Avagard™ Advanced Skin Hygiene Solutions

Working together
to achieve sustainable
Hand Hygiene compliance

- “One of the most important factors in reducing the transmission of healthcare associated infections is improved handwashing and skin hygiene practices.”¹
- According to the World Health Organisation, the major determinants for product selection include antimicrobial profile and user acceptance².
- The 3M Avagard Advanced Skin Hygiene products offer a broad range of inter-compatible antiseptic and non- active hand washing and skin hygiene solutions. They are chemically formulated to ensure they do not deactivate one another.
- All products are pH balanced and contain high levels of emollients and moisturisers, to nourish and maintain the skin’s integrity.

The 3M™ Avagard™ Advanced Skin Hygiene Solution:

- ✓ Is a hand washing and skin hygiene range of products designed for professional healthcare use.
- ✓ Includes general hand and body washes, antiseptic hand and body washes, antiseptic hand rubs, antispectic surgical hand scrubs and moisturisers.

The aim of placing the Avagard range within your facility is to improve infection control outcomes by making it easier for health care workers, patients and visitors to comply fully with hand hygiene practices.

Avagard General Hand and Body Wash (9230)

- Two in one product; for use as both a general routine hand wash and as a body wash when showering/bathing.
- To routinely clean visibly soiled hands and body.
- Gentle on the skin with moisturisers and emollients.

Avagard Antiseptic Hand and Body Wash with Chlorhexidine Gluconate 2% w/w (9232)

- Two in one product; for use as an antiseptic hand wash prior to clinical procedures (aseptic/non-surgical), and as a pre-surgical patient body wash.
- Broad spectrum bactericidal activity, with added moisturisers and emollients.
- Residual and cumulative efficacy.³

Avagard Antiseptic Hand and Body Wash with Triclosan 1% w/w (9233)

- Two in one product; for use as an antiseptic hand wash prior to clinical procedures (aseptic/non-surgical), and as a pre-surgical patient body wash.
- Broad spectrum bactericidal activity, with added moisturisers and emollients.
- Residual and cumulative efficacy.³

Avagard Antiseptic Surgical Hand Scrub with Chlorhexidine Gluconate 4% w/w (9241)

- An antiseptic surgical hand scrub for removal of resident and transient flora.
- Can also be used as an antiseptic skin cleanser for antibacterial hand washing prior to invasive procedures.
- Residual and cumulative efficacy.³
- Also contains moisturisers and emollients.

Antiseptic Hand Rub with Chlorhexidine Gluconate 1% w/w and Ethanol absolute 61% w/w (9200)

- For Healthcare professional hand antiseptic and surgical hand disinfection
- Fast and easy application, no brushes required
- Two active ingredients – providing immediate, persistent and cumulative activity
- Provides rapid antimicrobial kill of a broad spectrum of microorganisms with greater than 99.9% kill in 15 seconds³
- Fragrance, dye and preservative free
- Contains moisturisers to maintain skin integrity

Avagard Antiseptic Hand Rub with Chlorhexidine Gluconate 0.5% w/v in 70% v/v Ethanol (9250)

- A waterless hand rub offering rapid skin disinfection, easily mounted in point-of care and public areas.
- Broad spectrum activity kills 99.99% of pathogens (including MRSA) within 30 seconds.³
- Alcohol and chlorhexidine formula for ongoing bactericidal effect.³
- Meets hand hygiene requirements of key international, national and state/territory guidelines and initiatives.
- Gentle on the skin with moisturisers and emollients.

Avagard General Moisturising Barrier Lotion (9260)

- Hydrates, nourishes and protects the skin's outer layers, replacing moisture and oils lost by constant hand washing. This prevents cracked, dry skin which may harbour more pathogens, thus reducing the risk of cross-infection.⁴
- Fast penetrating, leaving a protective barrier on the skin restricting moisture loss.
- Does not reduce antimicrobial efficacy of Avagard antiseptics.

Brackets / Dispensing Options

The range is complemented with an array of easy to use, easy to clean bracket and dispensing options.

Antiseptic Hand Rub and Accessories

The use of the Avagard Antiseptic Hand Rub is facilitated by a range of dispensing options and accessories
